Data checklist for a facility-level GHG inventory in Viet Nam

With a blank Form 06 outline · Decree 06/2022/NĐ-CP as amended by Decree 119/2025/NĐ-CP

Scope and deadlines

- A facility-level inventory covers direct emissions (Scope 1) and indirect emissions from energy use (Scope 2), reported on Form 06.
- Next report: due before 31/3/2027 with 2025 and 2026 data; every two years after that.
- Scope 3 (supply chain, outsourced transport…) is not required for this report — add it only when customers ask (CBAM, ESG).
- Current list of facilities: Decision 42/2026/QĐ-TTg (2,441 facilities, in force 25/9/2026).

1. Data to collect (latest year, monthly where possible)

	Data group	What you need	Evidence / source
	Facility information	Name, address, tax code, legal representative; boundary, area; list of buildings and lines	Business licence, site plan
	Purchased electricity (Scope 2)	kWh per month per meter / facility; self-consumed solar (if any)	12 months of electricity bills
	Stationary fuels (Scope 1)	Diesel/fuel oil, coal, LPG, natural gas, biomass for boilers, kilns, generators (litres, t, m^3)	Store issue notes, fuel invoices
	Mobile fuels (Scope 1)	Petrol and diesel for the facility's trucks, cars, forklifts (litres)	Fuel log, invoices
	Fugitive emissions (Scope 1)	Refrigerant top-ups (R22, R32, R410A, R134a…, kg); CO_2 fire extinguishers	AC / chiller maintenance records
	Process emissions (Scope 1, if any)	Process raw materials (limestone, clinker, reductants…) and related output	Production and stock reports
	On-site waste / wastewater (if any)	Solid waste incinerated or landfilled on site (t); wastewater treated (m^3, COD)	Treatment plant logs
	Output and operations	Main products and output; operating days; headcount	Production reports
	Data management	Owner of each data type; where it is stored; meter reading frequency	Organisation chart

2. Blank Form 06 outline — facility GHG inventory report

Headings of Form 06, Appendix II, Decree 06/2022/NĐ-CP (amended by Decree 119/2025/NĐ-CP); the industry & trade sector follows Circular 38/2023/TT-BCT. Use it to prepare content; when submitting, use the official form in the legal text (in Vietnamese).

I. INFORMATION ON THE FACILITY

1. Name, address, business licence

2. Legal representative

3. Business and production activities

4. Commitments of the parties

II. OPERATIONS AND ACTIVITY DATA

1. Boundary and scope of the facility

2. Infrastructure, technology and activities

3. Emission sources and sinks

4. GHG data system; causes of limitations in the inventory

III. INVENTORY RESULTS

1. Methodology (data collection, emission factors)

2. Activity data related to GHG emissions

3. GHG inventory results of the facility

4. Reliability, completeness and uncertainty of data and results

IV. CONCLUSION

Total emissions, main sources, recommendations

Let EcoCheck do the heavy lifting

Enter data on EcoCheck (or let the AI assistant enter it from bills); the platform calculates Scope 1 and 2 with official factors and exports the Form 06 report in Word. EcoCheck experts help when needed.
